InterpWhat: Executive Summary

The AI-Powered Platform for Understanding What Matters Most

---

1. The Opportunity: The Silent Majority

In our hyper-connected world, a vast and valuable segment of our lives remains largely uninterpreted: the non-verbal communication of those we care for most. From the anxious pacing of a family pet to the subtle cues of an elderly parent, we are surrounded by a rich tapestry of signals that we struggle to understand. This gap in understanding leads to stress, missed opportunities for connection, and costly interventions.

InterpWhat is a first-of-its-kind AI platform designed to bridge this communication gap. We are building the "Google Translate" for non-verbal communication, starting with the massive and emotionally resonant pet market.

The Problem: * **Pet Owners** are desperate to understand their pets' needs, leading to an estimated **$75 billion** spent annually on behavioral issues in the U.S. alone. * **Animal Shelters** face high return rates (up to 20%) due to behavioral mismatches, costing them millions in operational overhead. * **Caregivers** for non-verbal individuals (babies, elderly with dementia) experience significant stress and burnout, a market valued at over **$200 billion**.

Our Solution: InterpWhat is an AI-powered platform that analyzes photos, videos, and audio to translate non-verbal cues into actionable insights. Our initial product, **InterpPet**, provides pet owners and shelters with a powerful tool to understand animal behavior, improve welfare, and strengthen the human-animal bond.

---

2. Our Product: InterpPet

InterpWhat is a live, functional web application with a clear path to native mobile apps. Our platform offers a suite of features designed to provide a comprehensive pet parenting experience:

- **AI Behavior Analysis:** Users upload a photo or video, and our AI provides an in-depth analysis of the pet's emotional state, needs, and potential health issues.
- **Breed Identification:** Automatically detects breed and provides breed-specific care tips.
- **Care Reminders:** A push notification system for medication, appointments, and grooming.
- **Multi-Pet Comparison:** Side-by-side behavioral timelines for multi-pet households.

Our Unfair Advantage: We are not just another pet app. We are an **interpretation platform**. Our core AI engine is designed to be modular and extensible, allowing us to rapidly expand into new, high-value verticals.

---

3. The Market: A $500M Beachhead

The U.S. pet tech market is a $2.8 billion * *industry, and our serviceable obtainable market (SOM) for InterpPet is conservatively estimated at * *$500 million** annually. We have a clear, three-pronged go-to-market strategy:

1. **Direct-to-Consumer (D2C):** A freemium SaaS model with two subscription tiers, Essential ($14.99/mo) and Premium (29.99/mo).
2. **Shelter Partnerships (B2B2C):** A subscription for shelters ($33/mo) that provides them with tools to improve animal welfare and a revenue-sharing model for referred adopters.
3. **Affiliate Marketing:** A generous commission structure for pet influencers, bloggers, and related businesses.

Financial Projections: Based on our current traction and market analysis, we project $2.8M in ARR by Year 3 * *and * *14.2M by Year 5** from the pet vertical alone.

---

4. The Vision: Beyond Pets

Our beachhead market in pets is just the beginning. The core AI technology we have built is directly applicable to other high-value, underserved markets:

- **InterpElderly:** A tool for caregivers to understand the needs of non-verbal elderly patients.
- **InterpBaby:** A monitor that interprets infant cries and behaviors for new parents.

By capturing these adjacent markets, we expand our TAM from $2.8 billion * *too ver * *200 billion**.

---

5. The Team: Mission-Driven Founders

InterpWhat was born from a place of love and necessity. Our co-founder, **Chantell**, is a lifelong animal lover who created the app in memory of her dog of 17 years, Paisley. She is driven by a mission to ensure no pet is misunderstood. Her partner, a **seasoned technologist**, brings the expertise to build and scale the platform.

This is not just a business; it is a passion project with a clear path to profitability and immense social impact.

---

6. The Ask: Fueling the Rocket Ship

We are seeking a **$750,000 seed investment** to achieve the following milestones over the next 18 months:

- **Launch Native Mobile Apps:** Develop and launch native iOS and Android apps to unlock premium features and improve user experience.
- **Scale Customer Acquisition:** Aggressively expand our GTM strategy to acquire our first 10,000 paying customers.
- **Secure 100 Shelter Partners:** Onboard 100 animal shelters to our platform, creating a powerful distribution channel.
- **Begin R&D for InterpElderly:** Start the research and data collection for our next vertical.

InterpWhat is a rare combination: a massive market opportunity, a working product with clear product-market fit, a mission-driven team, and a scalable business model. We invite you to join us in building the future of understanding.
